COLOR PRODUCTION
DIGITAL PRESS

BENEFITS

End-to-end productivity across an extensive media range

Automatic duplex printing up to 300 gsm

Speeds up to 70 ipm

Exceptional image quality

Highly accurate registration

Innovative Consistently Vivid (CV) toner

3 powerful workflow options

Flexible finishing capabilities

TENAU

From the award winning imagePRESS family

A powerful and versatile colour production press, the imagePRESS C800/C700 is the newest member of the award winning imagePRESS family of digital colour and B&W presses. It builds on the highly successful imagePRESS C7011VP(S) series, using new and upgraded proven technologies to deliver advanced levels of innovation, print quality, productivity and versatility that result in highly satisfied customers and more revenue coming in.

BIG GROWTH OPPORTUNITIES IN A SMALL FOOTPRINT

LONG-SHEET PRINTING

Auto duplex print up to 30-inch sheets to help expand application offerings, such as dust jackets and six-page brochures.

imagePROGRAF PRO-4000

Introducing the Canon 44" imagePROGRAF PRO-4000 largeformat professional printers with 11-Color plus Chroma Optimizer ink system

THE PRINTERS THAT ARE EQUALLY OBSESSED.

ANTI-CLOGGING TECHNOLOGY

The PF10- print-head with FINE technology generates fast print speeds and reduces the possibility of clogging. Ink ejection conditions are precisely checked by sensors, and if a clog is detected, another nozzle will automatically provide backup.

EFFORTLESS MEDIA HANDLING

Loading media on a Canon large-format printer has never been easier. Simply set the roll holder in the printer, rotate the roll holder handles, and let the media automatically feed into the printer. And since there's no need to touch the paper, you further reduce the risk of creasing and blemishes.

MULTIFUNCTION ROLL SYSTEM

The optional, dual-purpose Multifunction Roll System can be used in two different ways: a two-roll media system during the day, when production is high, and a bi-directional Take-up unit at night, when large, unattended prints are running.

COLOR CALIBRATION

Producing the correct color is paramount when printing high-quality, archival work. The built-in Color Calibration function uses multi-sensors to read color density and automatically calibrate the printer, so that the last print looks as stunning as the first.

imagePROGRAF PRO-2000

Introducing the Canon 24" imagePROGRAF PRO-2000 largeformat professional printers with 11-Color plus Chroma Optimizer ink system

KEEP YOUR COLOR **IN LINE**

LUCIA PRO INK SYSTEM

The LUCIA PRO -11Color plus Chroma Optimizer ink system satisfies the demands of the most critical photographer or graphic artist. Denser droplet placement provides a broader color gamut, and the Chroma Optimizer provides improved gloss uniformity for superb glossiness and anti-bronzing. Incredibly accurate color reproduction, outstanding image clarity, and enhanced detail in darker areas distinguish each print. On fine art papers, higher black density renders even the finest shadow detail for a print that becomes a work of art.

-11INK SYSTEM PLUS CHROMA OPTIMIZER

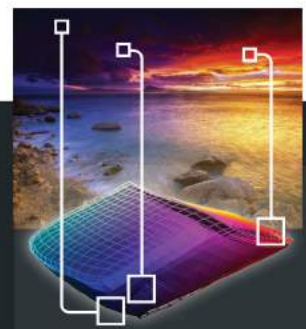

Using new pigment ink with modified compositions, LUCIA PRO Inks have enabled a broader color gamut and greater shadow reproduction in dark areas.

NO SWITCHING OF BLACK INKS

On other printers, switching from matte black to photo black consumes a significant amount of ink and time. The PRO Series is designed to work seamlessly when changing media types. Matte black and photo black inks have their own dedicated nozzles, so no switching is necessary. You can print on fine art paper then glossy paper with no worries, no changes, and no waste.

WIDE COLOR GAMUT

This new ink system adopts 11 colors and Chroma Optimizer. It helps you achieve improved color reproduction and image clarity as well as enhanced darker areas. This system faithfully reproduces colors and dark areas crucial for printing works of fine art. And the newly formulated blue and magenta inks will help recreate the finest details when printing nightscapes and sunsets.

imagePROGRAF PRO-4000S

The imagePROGRAF PRO-4000S is designed to deliver the high volume, outstanding quality, large format (up to 44")

- New – LUCIA PRO pigment 8 ink
- New – advanced precision print head
- New – image processing engine
- New – rigid platform for best quality
- Dual roll unit
- Double-speed printing
- Colour calibration
- Great selection of software

Advanced printing solutions ideal for bringing production, signage/commercial photography, and proofing businesses to the next level of color.

ImagePROGRAF iPF 6400S

FEATURES

- **8-color LUCIA EX ink set** is formulated for sophisticated photographic expression with its brilliant range of vibrant colors, smooth gradations, and incredibly fine details.
- Optional SU-21 Spectrophotometer for the iPF6400S provides the ability for **advanced color management and color consistency** across the entire line of iPFX400S printers.
- Color Calibration Management Console provides **centralized color management** in multiprinter production environments.
- A new Multi-Sensor **helps improve density detection accuracy** over previous models.
- Fast and Economy print modes produce high-speed output that help **lower print costs**.
- Sub-ink tank system and high-capacity ink tanks for **continuous printing**.
- A library of software solutions is included, such as PosterArtist Lite* for **easy poster creation** and Accounting Manager to help **calculate and track print jobs**.

*Included with iPF6400S and iPF8400S. PC only.

The Best Photo Lab Solution?

■ **Amazing Photographic Print Quality**

- Up to 1,440 x 1,440 dpi utilizing EPSON UltraChrome D6 six-color ink technology

■ **A Smart Business Decision**

- Low hardware pricing with an aggressive cost-per-print

■ **The Fastest Chemical-Free Photo Lab in it's Class**

- Up to 650 4" x 6" prints per hour; or up to 260 8" x 10" prints per hour

■ **Easy-to-Use & Maintain**

- Simple consumables loading and management; exceptional space-saving design

■ **Quite Possibly the Fastest Photo Lab in it's Class**

- Up to 650 4" x 6" prints per hour at 720 dpi; or up to 200 per hour at 1,440 dpi
- Up to 260 8" x 10" prints per hour at 720 dpi; or up to 70 per hour at 1,440 dpi

PRINTING THAT MEANS BUSINESS

- Simple to operate with a compact & light weight design
- Designed for commercial photo & photo merchandise production
- Produce high quality consumer, business & professional photo prints, along with ID & passport photos, menus, awards, cards, fliers & more
- Print durable Colour & B&W images on Gloss, Lustre & Matte media
- Produce prints sized from 102mm x 89mm to 210mm x 1000mm
- Produce up to 360 6" x 4" photos per hour in production quality
- Print direct from common photo applications or via optional Epson Order Control software with integrated job costing, scheduling, image editing & colour control

Ideally suited for:

- Photo production sites,
- Independent photo shops,
- Event photographers,
- Copy shops,
- Needs to print high-quality images,
- Greeting cards or mixed print jobs on demand.

Adhesive and Production papers available

Roll to cut-sheet support — features built-in cutter for added convenience

Epson Enters Direct-To-Garment T-Shirt Printing Market

Performance and reliability meet to drive more profit

High-quality, flexible and economical

Offering great value, this direct textile printer is perfect for producing individual items or small runs – whether you're printing on 100% cotton, or mixed fabrics with at least 50% cotton. What's more, it's easy to operate, so it guarantees seamless production.

The large colour gamut provides more vivid colours, sharp contours and smooth gradations. But the printed area remains soft and flexible, making t-shirts, for example, comfortable and durable.

Large-Format Printing System

LPS-24PRO

24-inch digital silver halide printer

The Award-Winning LPS-24 PRO is a large format silver halide printer designed to print a variety of sizes from(5"x7")up to jumbo panorama size (24"x100")

Various Prints

Various print sizes

The 24.5 inch maximum paper width can satisfy a diverse range of large-format print demands.

☒ The following conditions are requirements to make prints longer than 914mm.

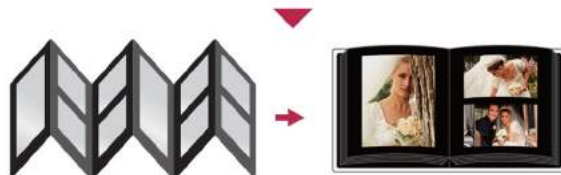

1. The paper width needs to be 457mm or more.
2. An option needs to be installed.

☒ The maximum paper advance length for 127mm width paper is 457mm.

A wide range of print services

You can easily use the LPS-24PRO to provide printing services for making albums to commemorate such things as weddings, vacations, etc.

TENAU

A Revolutionary Silver Halide Printer

The LPS-24 PRO is designed to meet the quality demands of portrait and commercial professional labs. Dual magazine capability allows both a 12" and 24" magazine to be loaded at the same time, enabling prints of various sizes to be made without changing magazines. Processing capacity ranges from approximately 27 prints per hour for a 24" x 36" print to approximately 51 prints per hour for a 12" x 18" print. The LPS-24 PRO delivers high-quality output at very reasonable price. The LPS-24 PRO was the winner of the 2007 DIMA Printer Shootout in the RA4 Digital Printers, 13" to 29" wide category.

A Revolutionary Silver Halide Printer to Satisfy a Diverse Range of Large-Format Print Demands.

Approx. **350** prints / hour

Excellent features, amazing quality, and an unrivalled cost performance

The QSS-3801G answers today's market needs by providing higher quality prints, more value-added services, a more efficient workflow, and lower costs. In short, this minilab provides the solutions you and your customers need while achieving an excellent cost performance.

The first minilab in the industry to use direct-modulation laser diodes for all three colors (RGB)!

Our state-of-the-art digital laser engine, which employs advanced technology that has been developed and refined by Noritsu, boasts a 640dpi resolution and makes prints with 5 times more pixels than prints made with standard resolution minilabs. It accurately portrays fine details and color gradations, resulting in beautiful photos that are sure to satisfy your customers. This helps to maintain consistent print quality.

300dpi (8bit)

640dpi (12bit)

High capacity models to speed up your business

High quality, High capacity

Smooth operation with automatic functions

■ Colorimeter

The colorimeter is built into the processor. During setup, the setup print is automatically fed into the colorimeter as it comes out of the dryer.

■ Auto daily setup

Daily setup is carried out automatically using the program timer. This reduces the prep time required before business hours, helping you to reduce labor fees and use your time more efficiently.

■ Interrupted orders signified by LED lamp

The EZ Controller software has the unique ability to interrupt orders in process to give preference to urgent orders.

LED lamps on the order sorter are used in conjunction with this to indicate which orders have been interrupted and which print trays the interrupted orders are in.

■ Dual magazine system (option)

The dual magazine system enables you to increase the number of prints and/or variety of prints you can make without changing magazines.

Mitsubishi Premium Plus Inkjet Paper

High Quality Inkjet Media that Leaves Nothing to Chance

THE MOST ADVANCED TECHNOLOGY

Photo Paper (Glossy, Sami-Glossy)

Photo paper is a premium high-resolution resin-coated paper designed for the highest quality color images. Photo is ideal for photographic quality output where heavy ink laydowns are commonplace. These papers have excellent color reproduction.

Glossy Paper and Sami-Glossy Paper

These are uniquely coated high-resolution papers that feature water- and light-resistant properties. These papers dry instantly for easy handling and laminating. Designed for moderate to heavy ink laydowns. Moreover, these papers deliver sharp images and brilliant color without costly handling problems.

Matte Paper

These papers are high-resolution, bright, white, coated papers designed for quality output at an affordable price. Matte papers are ideal for everyday printing from simple monochrome documents to bright photographic output.

Digital Album Making Machine 7 in 1

Album Binding Solution

THE MOST INNOVATIVE AND EFFICIENT TECHNOLOGY IN ALBUM BINDING MACHINE

ALL in One album making machine is the new album making equipment developed by our company. It integrates creasing, binding, hot pressing, paper holding, digital cutter and air compressor together, which can keep shape for very long time, no glue failure, no fracture. It also takes less room and is easy to operate. We can finish album in a short time by one person by this equipment.

PERFECT CUTTING

PERFECT CREASING AND BINDING

PRECISE

MEMORY

CREASING

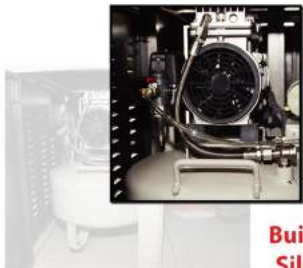

TENAU

Versatile Applications:

- Deluxe company presentations
- Wedding albums
- Baby books
- Memory books
- Portfolios
- Children's books

For photographic studios, photo labs, professional photographers, digital printers, copy shops and on-demand publishers

**Built in
Silent
Compressor**

The air compressor used in this machine can apply to other air controlled machines

**Album Corner
Cutting Unit**

Cut corner in any different sizes, it can adjust which you need. Corner Cutting Thickness is 50mm high efficiency and safety. It can make PET album, PVC album, menu, advertising, etc. And it is easy to operate and low cost.

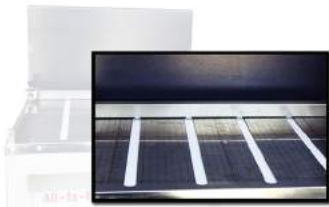

Heat Pressing Section

Heat Pressing Section with easy to use feature of constant temperature. The material used is verified, both self-adhesive material and hot melt materials can be use such as hot melt PET and self-adhesive PVC.

**Album Cover
Working Table**

The collapsible table at the side to save the space and ensure everything is finished in order

Creasing

Creasing Operation. Automatic Creaser with clearly marked table and indicator scale for accurate positioning

**Control
Panel**

User friendly Operation Panel provides full control and setting of the machine

Specification

Max Album Size	38 cm x 48 cm
Max Album Thickness	10 cm
Voltage	AC 220 v / 50 HZ
Power	3 . 2 k w
Pressure of Air Compressor	0 . 8 P a
Speed	200 p/h
Dimension	145*160*140cm
Weight	350 kg
Pressing and Cutting System	Digi-electric
Safety Protection	IR Protection

Album Hinge Making System

Synthetic Album Finishing Solution

TSMART
ALBUM HINGE MAKING SYSTEM

ALBUM HINGE MAKING SYSTEM

Relying on our wide industrial expertise and knowledge, we are considered to be one of the profound manufacturers and exporters of Window Cutting Machine. These are basically pneumatic driven machines that are best suited for dual side printing paper. Our offered Window Cutting Machine are widely appreciated among clients for their ability to maximize flat opening of digital photo book. Our clients can avail this cutting machine from us at highly affordable prices.

FEATURES:

This is a pneumatic operated machine, which is used for dual side or Single side printing paper. It facilitates in obtaining, maximum Flat Opening of the Digital Photo Book. Various types of paper (including Non- Terable paper), can be used in this machine. Depending on the width of the paper, different sizes of dies are available, for cutting various sizes of papers. You can choose from the standard dies or even get a customized size. The dies are available in different sizes: 8", 10", 12", 15", 18" (inches), Multiple Window Single Die For All Size Of Album.

* In this machine we have provided the Micro Controller base system to get V shape Window Cutting to get better Lay flat opening in an Album having many pages.

- * Easy to operate
- * Working width special 13" X 20"
- * Paper Feeding Manual
- * Paper GSM Page 100 to 400
- * Album Size 8", 12", 15", 17" 19"
- * Pressure 6 Bar Pneumatic
- * Dimensions (LxWxH)mm 1100X1050X1100

Album Bronzing Polishing Machine Print Polishing Solution

Album Bronzing & Polishing Machine

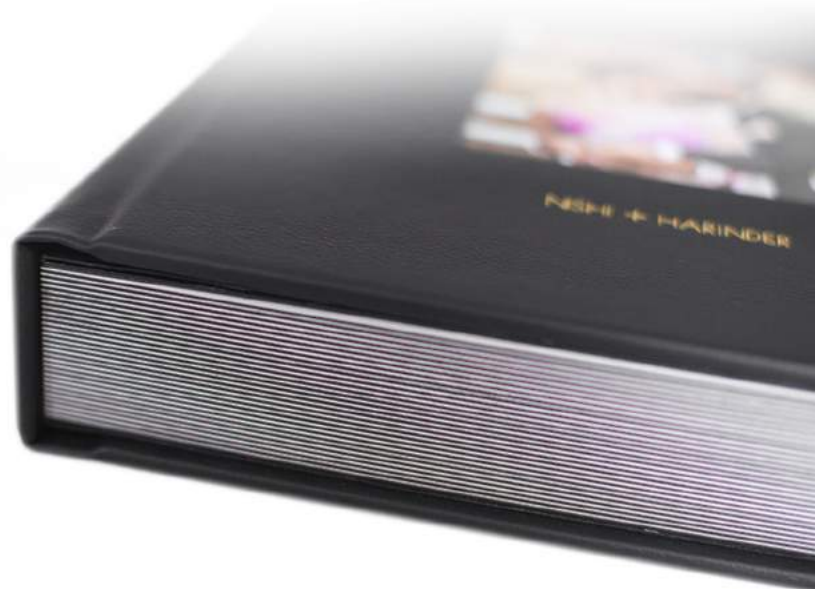

This machine is capable of grinding the edge automatically before gilding. The machine performs excellent in heating-up and heat preservation. No shedding after processing. Pneumatic clamps acts fast and exibly. It holds the album tightly and steadily under 2 air-cylinders control. Machine Dimension Power Weight 150*80*120cm AC220V/50HZ 230kg

Integrated function: gilding and polishing

Pneumatic clamp

Excellent performance in heating-up and heat preservation

This machine is capable of grinding the edge automatically before gilding.

Duplex Thermal Lamination Print Finishing Solution

Protect , present ,and enhance your materials

Hot & Cold Lamination Print Finishing Solution

SPECIFICATIONS

Laminating Width	1300 mm
Thickness of Substrate	80 g ~ 350 g
Thickness of Mount	1.5" in
Laminating Films	25 ~ 500 mic
Lamination Speed	200-1600mm/min
Number of Rollers	2 Rollers
Power Supply	AC 110, 220V/50Hz, 50Hz
Power Consumption	2000 W
Dimensions	1600*700*620 mm
Weight	132 kg
Stand	have package: wooden case

Electric Hot & Cold Laminator RL650

Color Gels

ilux™ **SUMMIT** 600C

MAKE ANYWHERE YOUR STUDIO, CORDLESS LIGHTING BY ILUX STUDIO EFLASH

- Up to 1034 flashes from a single charge • S-mount and EL-mount options
- Built-in receiver for wireless trigger • Consistent output and colour balance

HIGH CAPACITY POWER SUPPLY

The Summit's unique high capacity (12V, 6000mAh) battery pack is what makes true cable free operation possible. It slots seamlessly into the unit without spoiling the elegant and stylish design and at the same time provides up to 1034 flashes at half power on just a single charge!

Whether the battery is fully charged or nearing depletion, flash output remains accurate and consistent and same goes for its super fast recycle times. Built-in safety features prevent hazards in case the battery should somehow get damaged thus ensuring longer operational life.

HIGH SPEED SYNC (AUTO FP FLASH)

In addition to other multi-flash features, the Summit 600C has five Focal Plane (FP) flash settings which allows you to shoot at higher than your camera's standard X-sync speed without suffering typical FP shutter sync problems. This means you can shoot at much larger aperture settings so say for example conditions require you to use flash but you also want to blur out the background, as long as you can either override your camera's X-sync speed or it has an auto FP flash setting, then it won't be a problem for the iLux Summit!

Technical Specification

Max output (Ws)	600
Guide No.(m/100ISO)	68
Recycle time	0.1-5.5s
FP Flash(t=0.5s)	fp=1/11000 f2=1/9000 f3=1/16000 f4=1/4000 f5=1/200
Ready Indication	Beep/ M lamp / LED
Working Voltage	DC 12V
Flash Power	1/64 to full/7 stop range
Modelling Lamp	5W LED
Modelling Lamp (Control)	Full or off
Colour Temperature (K)	55000 + -220
Built in photo cell	Yes (IR & Flash)
Sync Voltage	DC 5V
Power Supply	12 V Li-ion Battery
Power Capacity	6000mAh
Battery Charging Time	5hrs with Self-Protection
Remote Triggering	12.4 Ghz Receiver card Built-in
Heat Protraction	Yes
LED display	Yes
Pop-out handle	Yes
Pistol Grip	Yes
Accessories	s-fit bayonet : El fit bayonet
Dimensions (LxWxH)	245 x 110 x 110 mm
Weight (with battery)	2.35kg
